BNX NETWORKS

Account Management

View Profile

- Click on the user profile to see information about user.
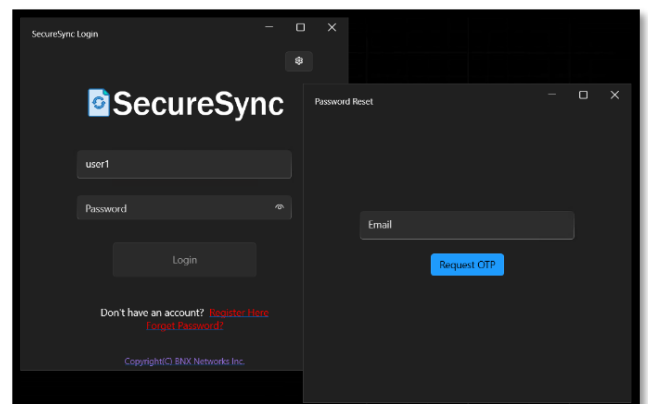

Real-time Backup Settings

- Once a file is uploaded, any subsequent changes made to that file on your local device will be automatically detected. SecureSync initiates the process of uploading the updated version of the file to your designated backup storage. After downloading that file again, the updated version of that file will be uploaded.

- User can add and remove extension from the exclude extension.
- User can enable windows startup.

Others:

Forget password

- User can recover their password by providing their security information.
- Click on the "Forget password" button.
- Enter your email address and get an OTP

- Enter OTP, new password and submit to update new password.

THE END
